Junior Developer

I am a Junior Developer with a passion for making ideas come to life. Complemented by a military history demonstrating a focused and reliable work ethic. My persistence has allowed me to quickly learn and develop skill sets needed to contribute to a team oriented environment.

SKILLS

- Languages: HTML5, CSS3, JavaScript, Python
- Frameworks/Libraries: Bootstrap, React, Node.js/Express, Django
- Databases: MongoDB, PostgreSQL
- Version Management: Git, Github
- IDE: Visual Studio Code

EXPERIENCE

Software Engineering Immersive Program | General Assembly | January 2020 – April 2020 | Washington, D.C.

Built interactive, full-stack apps in a full time, 500-hour program. Industry leading front-end and back-end web development languages utilized: HTML, CSS, JavaScript, ReactJS, NodeJS, MongoDB, Express, Python, Flask, SQL, and Django.

- **Hangman**: Designed a front end game emulating the classic game Hangman. This application was built in HTML, CSS and JavaScript.
- **Hero Database**: Created a front end application utilizing the Superhero API. The application contains a database of the most popular superheroes with a collection of data on their history and abilities all in a centralized location. Built with HTML, CSS, and JavaScript. Relies on fetches, promises, and event handlers.
- **Tv-Movie API**: Designed a JSON API containing data on movies and tv shows. The API contains complete CRUD functionality implemented with RESTful routes. Built with Node.JS MongoDB, and Express.
- **Tv-Movie Library**: Created a tv and movie library that fetches data from the Tv-Movie API I built in the back end. You have the ability to search for a movie or show of your choosing to view and get information. Built with React, Styled Components and Bootstrap.

Sales Consultant | Intuit | September 2019 – January 2020 | Fredericksburg, VA
- Utilized computer skills for processing customer requests within Salesforce.
- Demonstrated effective presentation skills and strong relationship building skills.
- Lead consultative sales conversation to understand the customers' needs and assist in order request as well as support request.

Mover | Rent the Help | April 2019 – September 2019 | Fredericksburg, VA
- Handled fragile, dangerous, and hazardous products to load and unload packages on and off trucks under instructions received from the supervisors.
- Collaborated with team members to organize loads efficiently, maintaining a clean and safe working environment.
- Ensured that orders, procedures and policies were carried out in regard to proper stacking and handling of the packages and boxes.

Logistics Specialist | United States Marine Corps | March 2015 – March 2019 Cherry Point, NC
- Inputted, extracted, and interpreted data into automated information systems for transportation via land, air, sea, and rail.
- Performed logistics management operations that involved planning, coordinating, or evaluating the logistical actions required to support a specified mission or other designated program.
- Examined shipment contents for record comparison, such as manifests, invoices, load plans, or orders, to verify accuracy.
- Supervised unit embarkation and logistics, ensuring all cargo is properly prepared for embarkation in accordance with federal regulations and established procedures to support various modes of transportation.
